PAPER 2: Dynamic Places

You must have: Resource Booklet (enclosed) Calculator, ruler	Total Marks
---	-------------

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions in Section A and **EITHER** Section B **OR** Section C.
- Answer the questions in the spaces provided
– *there may be more space than you need.*

Information

- The total mark for this paper is 90.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*
- Calculators may be used.

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

Answer Section A and EITHER Section B OR Section C.

SECTION A

Globalisation

Answer ALL questions. Write your answers in the spaces provided.

You must use the Resource Booklet provided.

- 1 (a) State **one** social challenge created by the rapid urban growth of megacities. (1)

.....

- (b) Study Figure 1 in the Resource Booklet.

- (i) Compare the changes in CO₂ emissions shown. (2)

.....

.....

.....

- (ii) Suggest **one** reason for the changes in CO₂ emissions shown for India and China. (3)

.....

.....

(Total for Question 1 = 28 marks)

TOTAL FOR SECTION A = 28 MARKS

SECTION B

Regenerating Places

Do not answer Section B (Regenerating Places) if you have answered Section C (Diverse Places).

Indicate which question you are answering by marking a cross in the box ☐. If you change your mind, put a line through the box ☒ and then indicate your new question with a cross ☐.

If you answer Section B, put a cross in the box ☐.

You must use the Resource Booklet provided.

- 2** (a) State **one** way the connectedness of a place might change over time.

(1)

- (b) Study Figure 2 in the Resource Booklet.

- (i) Calculate the mean number of employees per company.

You must show your working.

Give your answer to **one** decimal place.

(2)

Answer

- (ii) Suggest **one** reason local authorities encourage expansion of science parks as shown in Figure 2.

(3)

(c) Explain **two** ways local interest groups may affect decision making about regeneration.

(4)

1

.....

.....

.....

.....

2

.....

.....

.....

.....

(d) Explain how decisions made by the UK government may encourage regeneration and economic growth.

(Total for Question 2 = 28 marks)

Blank area for writing the answer to Question 2.

- 3 Students collected data about the number of pedestrians passing two locations (A and B) for one minute, at 30-minute intervals on a Monday between 8am and 12 noon. This was part of their research into a completed regeneration project.

One location was close to the completed regeneration project and the other was 2km away.

Study Figure 3 in the Resource Booklet.

- (a) (i) State the range of the data for location A.

(1)

- (ii) Suggest whether A or B is more likely to be closer to the location of the regeneration project.

(2)

- (iii) Explain **one** limitation of the design of this data collection method.

(2)

- (iv) Suggest **two** ways secondary data could be used to investigate the success of such regeneration projects.

(4)

1

.....

.....

.....

2

.....

.....

.....

- (b) You have also carried out fieldwork and research into a question about Regenerating Places.

Assess how far your conclusions answered the question posed in the geographical investigation.

SECTION C

Diverse Places

Do not answer Section C (Diverse Places) if you have answered Section B (Regenerating Places).

Indicate which question you are answering by marking a cross in the box ☐. If you change your mind, put a line through the box ☒ and then indicate your new question with a cross ☐.

If you answer Section C, put a cross in the box ☐.

You must use the Resource Booklet provided.

- 5** (a) State **one** reason for different levels of cultural diversity in places.

(1)

- (b) Study Figure 5 in the Resource Booklet.

- (i) Calculate the mean number of employees per shop.

You must show your working.

Give your answer to **one** decimal place.

(2)

Answer

- (ii) Suggest **one** way migration flows have changed the culture of areas like The Broadway, Southall.

- 6 Students collected data about the number of pedestrians passing two locations (A and B) for one minute, at 30-minute intervals on a Monday between 8am and 12 noon. This was part of their research into the levels of deprivation in two locations.

The locations were 2km apart.

Study Figure 6 in the Resource Booklet.

- (a) (i) State the range for the data for location A.

(1)

- (ii) Suggest whether deprivation is likely to be greater at location A or B.

(2)

- (iii) Explain **one** limitation of the design of this data collection method.

(2)

(iv) Suggest **two** ways secondary data could be used to assess the levels of deprivation in places such as these.

Pearson

SECTION A

The following resource relates to Question 1.

Figure 1

Percentage (%) change in CO₂ emissions for selected countries, 1990–2020

SECTION B

The following resources relate to Question 2.

Total number of companies	129
Total number of employees	7,250
Percentage (%) of companies that originated locally	61

Figure 2

Cambridge Science Park, developed jointly by the local authority and university

The following resource relates to Question 3.

Figure 3

Pedestrians passing two locations at 30-minute intervals between 8am and 12 noon

The following resources relate to Question 4.

- Hambantota is a coastal town in south-east Sri Lanka, a developing country.
- This region had limited investment from the national government and international companies. Local people lacked opportunities to participate in the global economy.
- Hambantota port opened in 2010 and aimed to be a gateway to India, but has struggled to attract business.
- In 2017, a Chinese state-run company was given a 99-year lease on the port and 15,000 acres nearby for a Special Economic Zone (SEZ) to set up new businesses.

Figure 4a

Information about Hambantota Port, Sri Lanka

Key

Roads

Urban area

Figure 4b

Location of Hambantota, Sri Lanka

SEZ, with cement works, tyre factory and oil refineries, built on farm land

Karagan Lewaya, a salt lagoon, provides a rare habitat for migratory birds including flamingos

Residential areas provide some labour for new businesses

Many tourists are visiting hotels, golf courses and beach resorts, arriving via the port. Jobs are created for local people

The port claims to be environmentally sustainable

Figure 4c

Hambantota and its surrounding area

The SEZ was once farmland used for rice production for local consumption.
Local protests led by Buddhist monks about loss of farmland, homes and fishing businesses were ignored.

The tyre factory was constructed in the SEZ by a Chinese company, near to local villages and a tourist resort.
Harmful pollutants were released during construction and this continued when the factory opened.

Figure 4d

Images of Hambantota, before and during the building of the SEZ

- 100,000 jobs were promised for local people, if the port continued to grow by attracting trade from the capital city and port of Colombo.
- Recently 27 businesses have set up in the SEZ, including the tyre factory (2,000 jobs) using rubber grown locally.
- Karagan Lewaya lagoon could be completely altered if the port expands. It has been used as a source of sand for construction.

Figure 4e

Future plans and concerns for Hambantota

SECTION C

The following resources relate to Question 5.

Total number of shops	209
Total number of employees	1,120
Percentage (%) of shops reflecting distinctive ethnicities and culture	74

Figure 5

The Broadway, Southall, London, a high street that has changed due to international migration

The following resource relates to Question 6.

Figure 6

**Pedestrians passing two locations at 30-minute intervals
between 8am and 12 noon**

The following resources relate to Question 7.

- Kingston is the capital city of Jamaica, a Caribbean island. It has a complex history of migration as a result of its colonial past.
- Since the end of the Second World War, Jamaicans have migrated to the UK in larger numbers and more recently to the US and Canada. Many of these migrants are highly educated, and the loss of their skills has serious implications for the country's productivity, and health and education services.
- Remittances (transfers of money) from international migrants make a sizeable contribution to family incomes and to Jamaica's economy.
- Recently, some people have returned to Kingston by choice, and some have been forced to return by the UK government.
- Kingston, a city which is growing economically, attracts migrants from elsewhere in the Caribbean and from all over the world. 84% of recent economic migrants from overseas were professional or senior managers.

Figure 7a

Information about migration to and from Kingston and Jamaica

Population of Jamaica (2022)	2.9 million
Population of capital city: Kingston (including New Kingston)	1.3 million
Jamaican migrants living overseas (2021)	1.3 million, including USA (792,000) UK (129,000) and Canada (149,000)
Overseas migrants in Kingston	24,000
Migrants from Jamaica with tertiary education (2010)	48%
Total remittances received in Jamaica (2021)	US\$ 3.4 billion, including 67% from USA and 12% from UK
Total Jamaica GDP (2021)	US\$ 14.8 billion

Figure 7b

Facts about migration and the economy in Kingston and Jamaica

I am a qualified nurse, now working in Canada. I send remittances to help pay my daughter's fees at Kingston University. I also paid for a new water and sewage system for the house.

I was born in Kingston and went to London in the 1960s as my father responded to a job advert for London Transport. I am waiting to be deported back to Jamaica because I cannot prove my right to remain in UK.

I am one of the 'barrel children', whose parents send clothes and books in a barrel by ship. My dad is an engineer and moved to UK 8 years ago for a higher wage.

I feel depressed because I miss my parents and get help from a school counsellor. Some older barrel children living nearby have got involved in crime.

I came back to Kingston after growing up and working in the UK. Now I volunteer at a local after-school club in the inner city, and have invested some of my savings in two local businesses.

Figure 7c

Opinions about migration in Kingston

Young people distribute food parcels to the elderly in Kingston who have been left without relatives on the island.

A class at Kingston University where some students are funded by remittance payments.

Figure 7d

People in Kingston affected by international migration
